- Large version (12 teams instead of 6)
- Deluxe version (Large version + immersive curved screens)
- Elaborated queueline
- Preshow

Easy to customize

TO FIT LOCAL TASTE AND PARK CULTURE

Multiple teams compete against each other up to a final winner, featuring an ultra-dynamic multi axis rotation. The competition takes place in one large room and all teams duel amongst each other, across 3 to 5 different scenes.

Action League™ is fully customizable and can easily be adapted to local tastes and park cultures.

The content (media, theming, background story) can be tailor-made to client specifications and theming requirements, ranging from purely game-oriented content to more immersive and storytelling-based gameplay.

Discover a preview of three turnkey theming and media packages, developed and designed to meet all needs!

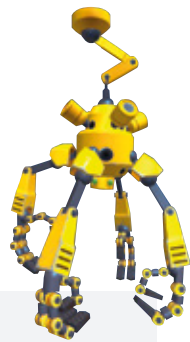

THE DAFT PIRATES

The Daft Pirates is a family-oriented adventure combining an engaging storyline with mounds of humor and a sequence of quirky situations!

Players are transported to a colorful island populated with cute characters. The island is soon invaded by a group of crazily armed funky pirates seeking the island's treasures hidden in a cave. Players must prepare an ambush to defend the stash and drive the pirates off the island.

G.R.I.T.

G.R.I.T.

G.R.I.T. (Giant Robot Intense Tournament) is a competitive game where teams climb into the driver seat of an enormous robot. Robots then face off against opponents, shooting at power nodes to boost performance, collect bonuses and inflict penalties.

This application relies on classic video game mechanics and an elaborate game design. "Power up everyone!"

THE GREEN HOUSE

THE GREEN HOUSE

The Greenhouse offers a player versus player interactive experience that relies on a group effort to progress the furthest in the game. Located in a steampunk world where plants have been subjected to monstrous experiments and have mutated into enemies of mankind, players are dared to clean up the mess. Participants must descend through level after level of the infested greenhouse to find and destroy the root of the problem and restore balance to the giant greenhouse.
